

Arizona Woodturners Association -- President's Message -- April, 2016

Greetings Fellow Turners!

As a reminder, we have our regular scheduled club meeting this Saturday at the Pyle Center in Tempe, at 12 noon. The topic will be bowls. For those of you that saw Ken Northern on the schedule for vacuum use and casting, he has had to delay that demo for a couple of months, but it will be forthcoming.

Ana is heading up our booth this weekend at the Maricopa County Fair. If you can give her a couple of hours, it would be greatly appreciated. She has been sending out regularly scheduled updates. If you can help, please coordinate schedules with her. It is a lot of fun, even if you don't want to turn in front of anyone, we can always use the help manning the booth and talking to people. If you would like to turn, we will have the Delta lathe there. (1" x 8tpi headstock) for your use. Bring your turning tools and some wood and have a blast!

We could use some help this weekend at the club meeting as well. I can go to the storage unit to get the lathe and other equipment, but it won't fit in my truck. (I have a camper shell and organizer in the back of my truck and it just won't fit.) We will also need some help getting the equipment back to the storage unit when the meeting is over. If you can help with a truck or a little manpower, it would be greatly appreciated. Please let me know if I can count on you. turnsandtwists@gmail.com, or you can always get ahold of me through the link on our website.

This month's President's Challenge is plates/platters. I hope you have all been working diligently at something to share with the Club. I know I have!

Thank you all, I look forward to seeing you on Saturday!

Sincerely,
Dale Gillaspy
President, Arizona Woodturners Association
